SUMMARY

MCA student and Full Stack Developer with hands-on experience in building web applications using the MERN stack. Skilled in developing RESTful APIs, implementing authentication, and working with databases and cloud deployments. Passionate about creating secure, scalable, and user-friendly applications through real-world projects.

SKILLS

Programming Languages: C++, JavaScript, HTML, CSS, Java, Python, ASP.NET, C#

Libraries & Frameworks: React.js, Node.js, Express, Django, Tailwind CSS

Databases: MongoDB, MySQL

Tools and Platforms: VS Code, GitHub

Soft Skills: Critical Thinking, Problem Solving, Team Collaboration, Communication

PROJECTS

SpeakWise – AI-Powered Language Pronunciation Platform

MERN, TypeScript, Tailwind CSS, Radix UI, Recharts, Vitest, Jest | [Live](#) • [GitHub](#)

- Developed a full-stack AI pronunciation coaching platform with real-time speech analysis, multi language support, and accuracy/fluency scoring using React.js, TypeScript, Node.js, Express.js, and MongoDB.
- Implemented production grade backend architecture and security, including RESTful APIs, JWT authentication, bcrypt password hashing, Helmet.js, rate limiting, and robust input validation.
- Optimized performance, SEO, and reliability by implementing meta tags, structured content, semantic HTML, and automated testing (Vitest, Jest, RTL, Supertest, Playwright), achieving 80% backend and 70% frontend test coverage, and deploying via Vercel, Koyeb, and MongoDB Atlas.

GearGuard - The Ultimate Maintenance Tracker

React.js, Node.js, Express.js, MySQL, Material UI | [GitHub](#)

- Developed a full-stack equipment maintenance management system using React.js, Node.js/Express, and MySQL, featuring role-based dashboards (Admin, Manager, Technician, User), Kanban board for request tracking, and a maintenance calendar for preventive scheduling.
- Implemented secure JWT authentication with bcrypt password hashing, email-based password reset functionality, and role-based access control to support multi-tenant organizational workflows.
- Built responsive UI components with Material UI, integrated drag-and-drop functionality using @hello-pangea/dnd, and FullCalendar for scheduling, supporting both desktop and mobile platforms.

Class Management System – VCS

HTML, CSS, JavaScript, Python, Django, MySQL | [GitHub](#)

- Built a full-stack system for managing private class operations like attendance, grades, and user roles.
- Included full auth system: login/signup for admins, staff, and students with role dashboards.
- Worked in a small team, staying on task with clear priorities and solid version control.

EXPERIENCE & TRAINING

Teaching Staff - BECIL Training Centre | Aug 2021 – Dec 2023

- Delivered CCC, Tally, and basic web development training to 500+ students while managing admissions, batch scheduling, and academic operations.

EDUCATION

Masters of Computer Applications LJ University, Ahmedabad – 7.25 (Current SPI)	2024 – 2026
Bachelor of Computer Applications Gujarat University, Ahmedabad – CGPA: 6.33	2021 – 2024
Higher Secondary School Muktajivan High School, Ahmedabad – Percentage: 61.73	2021

CERTIFICATIONS

Generative AI: Fundamentals – IBM | [View](#)
The Bits and Bytes of Computer Networking – Google | [View](#)
